

# SPECIAL REPORT on

## Difficulties walking and other Balance problems

FOR THOSE WHO EXPECT CHIROPRACTIC TO BE ABOUT MERELY BAD BACKS AND NECKS, this can be confusing. So, *please*, let me unconfuse you, from the start.

Chiropractic is NOT the treatment of back and neck pain. It is NOT the treatment of anything. That's right, as a (real) chiropractor, I do not treat anything, including bad backs and necks. I do not treat heart and/or circulatory conditions, but people can get well, here, anyway.

So... if Chiropractic is not a treatment, *what is it?* It is the PURSUIT OF HEALTH, through the correction of interference to the brain and nervous system, what we call Vertebral Subluxation Complex (VSC), by chiropractic adjustments, by hand, to the spine, *allowing the body and mind to heal, to function at a higher level.*

A lot of people get balance and coordination problems, especially as they get older. Could be difficulty walking, or getting in and out of chairs, or using the stairs. Very common. Your (medical) doctor will lead you to believe that *"there's nothing anyone can do. What can you expect at your age?"* If it's bad enough, he or she will send you to a neurologist, who surely agrees.

What DOES this medical "genius" do? He or she will put you through a bunch of tests, and come up with a diagnosis. A diagnosis is just a name, but you are made to believe that that diagnosis explains everything (it does not), and is the ultimate answer to your suffering. (It is not.) You're put on some drug to manage your symptoms, but you're still having problems. When the side effects of that drug become too much, you're switched to another drug. And you're still wobbly and weak.

So far, no one has wondered WHY you are having problems you are having. No one had even given a thought to CAUSE, to why you have bad balance and coordination. No one has ever even considered how you can get well. **Pretty much, in the end, all they have for you is a cane... then, a walker.**

Here's some basic biology that evades your primary doc and your specialist... Your brain and nervous system **controls and coordinates balance, coordination, strength, etc.** If there is interference to that control, these functions will not work properly. Why not correct the interference, allowing the body to heal itself, naturally?

Here, at THE HARTE OF CHIROPRACTIC, I do not diagnose, nor do I treat anything. I correct interference, allowing your body to heal not just your digestive difficulties, but to allow your body, as a whole, to function better. Health.

*"When I came here, I was in so much pain, I could barely walk. Now, not only can I walk pain-free, I can jump, run and bike. My body feels more flexible than it was before."* - Lauren Battaglia, San Anselmo

*"I want to thank Dr. Harte for putting the spring back in my step. It was very productive, feeling much better than I did before my sessions with the Doc. I want to share an incident while I was at his clinic, **a lady walked in with a walker and after Doctor Harte adjusted her, she walked out from the room and almost forgot her walker...that is how good/effective the care is that Dr. Harte provides.**"* - J.J. Sanchez, Fairfield

*"Able to stand and do exercises. Socially doing better. Using my cane less to walk." - Janet Louie, San Francisco*

*"I have been suffering from chronic back pain and neck pain for over 15 years. It has affected my hand, and the last few years I have difficulty walking. I started walking with a cane, and I noticed that my spine is crooked. A year down the line my family started noticing that my spine was crooked. I had a difficult time walking long distances.*

*Dr. Harte called me not once, but twice to try to get a hold of me. I had never heard of vertebrae subluxation complex. In the past I had jobs that required physical strength, and I injured my neck, hand, and knees lifting heavy loads.*

*I have been seeing him for several months now, and for the first time I was able to walk without a cane. My husband noticed right away. I am noticing Improvements in my energy levels. There is less pain on my body. He checks you every 12 sessions, and has high tech instruments to watch your progress. He has a funny sense of humor, and really cares for his patients. The x-rays are proof of where your body is misaligned. I am glad to see a doctor that understands my condition." - Janet Louie, San Francisco*

*"From non-believer to believer of Chiropractic! More energy, I think from better sleep. **Noted better balance, which was very poor!!** Circulation in both arms almost back to normal. Use of my right hand now about 95% from practically nil. All of the above with a sigh of relief and well-being and an enormous 'thank you' to Dr. Harte."*  
- Betty Koenig, Novato

*"Better balance... better life!" – Sadie Salim, Mill Valley*

*"I arrived with some **tinnitus** in one ear and some **balance issues**. Dr Harte, because of my limited time in the area, had me see him twice a day for approximately a month. The results were outstanding! Tinnitus diminished, my sleep improved, my energy level increased and, more importantly, my sense of well-being and contentment grew. There are no gimmicks here... just the proper*

*adjustments without the silly cracks and noise effects so popular on You Tube. I wish I had started chiropractic care 35 years earlier, but I didn't know any better!!! Did I mention how commodious the office is?" – Tony Morgan, Corte Madera, now Miami*

*"I'm five weeks in and have stronger vitality and immunity, **better balance**, digestion and sleep. My hip feels normal and I can regularly go on strenuous hikes without any recourse and my neck is comfortable and has much more mobility." - Kim Crozier, Santa Rosa*

Fine, you've read this report. **Now you have a clear choice.** You can continue to do what you're doing, or you can not only change the direction of your balance and coordination problems, but you can change the entire course of your health, your life! How? Through (real) chiropractic care, I liberate your nervous system, *allowing* your body to heal itself, from the Inside-out, through gentle, specific, scientific chiropractic adjustments.

**How do you start?** How do you find out about your specific situation? We begin with an extensive history, an examination like you've never had before, three neurological scans, and digital spinal X-rays. Then, I spend a great deal of time analyzing your individual situation, and we sit down to discuss findings, and how you can get well.

All this... the history, the examination, the nerve scans, the X-rays and the Report of Findings, is normally \$1075, which is a gift right there. But, because you've taken the time to read this special report, and because you were referred by a Member of this practice, you save \$905. All this will cost

you *only \$170*. Call me now, to set up a convenient time for your first visit. 415/460-6527. *"I will help you."* – Dr. D. Harte (D.C.)
