

Authorization for Medical Care/Consent to Treat & Statement of Non-Pregnancy & X-ray Consent

Authorization for Medical Care: I do hereby consent to, and authorize, all medical and chiropractic treatment, x-rays, laboratory, and other medical procedures that may be performed or prescribed by my physician or any other person whom he/she may designate. I understand that no promise; guarantee or warranty has been made regarding the results of any medical treatment or procedure.

Informed Consent For Chiropractic Care: A patient, in coming to the Doctor of Chiropractic, gives the Doctor permission and authority to care for the patient in accordance with the Chiropractic tests, diagnosis and analysis. The Chiropractic adjustment or other clinical procedures are usually beneficial and seldom cause any problem. In rare cases, underlying physical defects, deformities or pathologies may render the patient susceptible to injury. The doctor, of course, will not give a Chiropractic adjustment, or health care, if he/she is aware that such care may be contraindicated. Again, it is the responsibility of the patient to make it known or to learn through health care procedures whatever he/she is suffering from: latent pathological defects, illnesses, or deformities which would otherwise not come to the attention of the Doctor of Chiropractic. The patient should look to the correct specialist for the proper diagnosis and clinical procedures. The Doctor of Chiropractic provides a specialized, non-duplicating health service. The doctor of Chiropractic is licensed in a special practice and is available to work with other types of providers in your health care regime.

Statement of Non-pregnancy & X-ray Consent: X-rays are one way of looking inside a person's body. Chiropractors use x-ray analysis as one of the tools that help tell if your body is properly balanced and if your vertebrae and other skeletal structures are in proper alignment. This helps us determine your structural integrity.

Long-standing spinal nerve stress (vertebral subluxations) may cause a condition of inflammation of the bone and related structures and premature aging called spinal degeneration. An X-ray can tell us if you have this condition.

It is best to avoid X-rays when pregnant. I have read, and understand the foregoing. Please sign below so we may be able to proceed.

I, _____, in signing this form, state to the best of my knowledge, there is no pregnancy, confirmed or suspected at this time. I release this clinic from any and all damages arising from any and all procedures of a diagnostic or treatment nature with reference to the possibility of pregnancy. I hereby release James B. Doty, D.C. and whomever he may designate as his assistants from any and all liability. I hereby authorize James. B. Doty, D.C. and whomever he may designate as his assistants to take x-rays.

Patient's Name Printed: _____

Date of Birth: _____
