

# Antronex®

## Helps Keep Histamines at Acceptable Levels

Histamine is released in essentially every tissue of the body whenever that tissue becomes damaged, inflamed, or is the subject of a reaction from environmental or seasonal stresses. Histamine is known to be involved in a myriad of physiological conditions. Maintaining your body's defense systems helps keep histamine at acceptable levels.

## How Antronex Keeps You Healthy

### *Helps maintain a healthy liver*

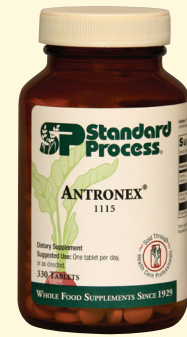

The liver is the site of many metabolic functions of which cleansing is vital. yakriton, a bovine liver fat extract discovered in the 1920s by Japanese researchers, has been shown to help maintain a healthy liver by enhancing blood-filtering capabilities.†

### *Supports immune and respiratory system response*

When histamine production is stimulated, it creates antigen-antibody reactions often involving the respiratory and immune systems. These types of reactions may cause bronchial smooth-muscle contraction causing restriction of airflow in the lungs. Histamine presence can be inactivated via vascular changes in the circulatory system. Since the liver filters almost one-third of the total body blood flow each minute, Yakriton's improvement of blood flow through the liver enhances the cleansing of blood.†

### *Assists immune system function*

Among many other important duties, the role of calcium in the diet has also been shown to increase immune efficiency. Studies show that calcium is necessary for the proper functioning of certain white blood cells. Natural killer cells—lymphocytes, leukocytes, monocytes, and neutrophils—are all at least partially dependent on extra-cellular calcium and magnesium. Even though the human body requires calcium daily for many different reasons, it is often lacking in many diets today. Calcium should always be consumed as part of the regular diet.†

Introduced in 1953

**Content:**

90 tablets  
330 tablets

**Suggested Use:** One tablet per day, or as directed.

**Supplement Facts:**

Serving Size: 1 tablet

Servings per Container: 90 or 330

	Amount per Serving	%DV
Calories	1	
Calcium	40 mg	4%
Bovine Liver Fat Extract ( <i>Yakriton</i> )	15 mg	

**Ingredients:** See Supplement Facts.

Other Ingredients: Calcium lactate, calcium stearate, arabic gum, and mixed tocopherols (soy).

Sold through health care professionals.

*Please copy for your patients.*

**GF** This product contains less than 10 parts per million of gluten per serving size or less than 20 parts per million per the suggested use listed on each product label.

# Antronex<sup>®</sup>

## What Makes Antronex Unique

---

### *Product Attributes*

#### **Contains 15 mg of yakriton per tablet**

- › A bovine liver fat extract that has been shown to help maintain a healthy liver
- › One of its most valuable uses lies in its blood filtering capabilities<sup>†</sup>

#### **The calcium lactate in Antronex is a pure-vegetable source of calcium**

- › Not derived from a dairy source

### *Manufacturing and Quality-Control Processes*

#### **Low-temperature, high-vacuum drying technique**

- › Preserves the enzymatic vitality and nutritional potential of ingredients

#### **Degreed microbiologists and chemists in our on-site laboratories continually conduct bacterial and analytical tests on raw materials, product batches, and finished products**

- › Ensures consistent quality and safety

#### **Vitamin and mineral analyses validate product content and specifications**

- › Assures high-quality essential nutrients are delivered

### **Whole Food Philosophy**

Our founder, Dr. Royal Lee, challenged common scientific beliefs by choosing a holistic approach of providing nutrients through whole foods. His goal was to provide nutrients as they are found in nature—in a whole food state where he believed their natural potency and efficacy would be realized. Dr. Lee believed that when nutrients remain intact and are not split from their natural associated synergists—known and unknown—bioactivity is markedly enhanced over isolated nutrients. Following this philosophy, even a small amount of a whole food concentrate will offer enhanced nutritional support, compared to an isolated or fractionated vitamin. Therefore, one should examine the source of nutrients rather than looking at the quantities of individual nutrients on product labels.

---

Studies on nutrients generally use large doses and these studies, some of which are cited below, are the basis for much of the information we provide you in this publication about whole food ingredients. See the supplement facts for Antronex<sup>®</sup>.
