

Shrewsbury Family Chiropractic

Information Sheet for Prospective Chiropractic Assistant

We are a friendly and passionate wellness-based chiropractic centre in the beautiful town of Shrewsbury. Having moved into a larger premises in early 2015, our practice has continued to grow. In our current team we have Glenn, a New Zealand trained chiropractor, Tracy, our fabulous CA and Rosalind, our practice manager. The newest member of our team is chiropractor, Dr. Laura who is starting with us in July 2016.

We have a large reception area, private and open plan adjusting rooms, an office and a dedicated scan room. Our communal facilities are modern and well presented.

In Wem, north of Shrewsbury, our satellite practice allows us to provide care one day a week for North Shropshire's more rural community.

Chiropractic care is focused on ensuring that the master control system (nervous system) in the body is able to function normally. We do this by locating and adjusting areas of the body that are interfering with normal nerve flow. Commonly these areas are subluxations (misalignments) of the spine but other joints and tissues can also interfere with nerve flow. If our body and brain are not communicating normally then as a result our body will experience abnormal function. Left too long, abnormal function will not just cause postural adaptations and movement changes, it will cause the body to degenerate and will often cause the expression of signs/symptoms of poor health and disease.

We know that offering vitalistic wellness chiropractic care to our community and promoting positive life-changes will aid people's overall health and wellbeing. We provide patient education to encourage natural nutrition, exercise and conscious living, with chiropractic at the heart of what we do. If you are passionate about true health, this could be the place for you!

We will offer you:

- **Full training and mentoring.** We are excited about welcoming a new member to the team and supporting them to achieve their professional and personal potential. Full training on administrative duties and the principals of chiropractic will be given.
- **A fantastic, modern working environment** in a practical part of the town.
- **Professional Development Opportunities**, both within the practice and through national courses/conferences.

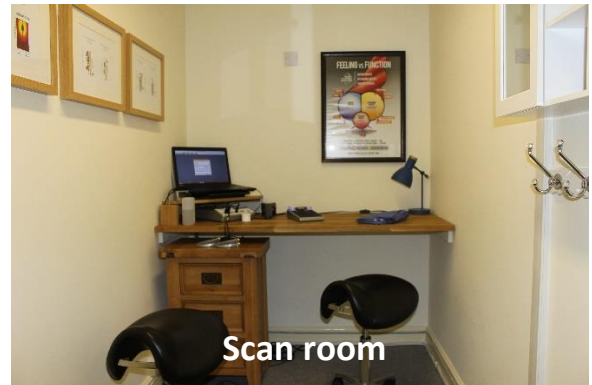

To apply, please send us a copy of your CV and a covering letter demonstrating that you meet the person specification criteria.
