Disclosure and Informed Consent
Treatment Protocols

In this office, we utilize trained staff personnel to assist the doctor with portions of the physical examination, X-ray taking, Cold Laser Protocols, Stretching and Exercising instructions, etc.

Stroke: Stroke is the most serious problem that has been associated with Chiropractic adjustments. Stroke means that a portion of the brain does not receive enough oxygen from the blood stream. The results can be temporary or permanent dysfunction of the brain, with a very rare complication of death. In extremely rare instances Chiropractic adjustments have been associated with strokes that arise from the vertebral artery only; this is because of vertebral artery is found inside the neck vertebrae. Certain types of high velocity neck adjustments may potentially be related to vertebral artery strokes, but no one is certain. The most recent studies (Spine, Vol. 33 No., February 2008)

Disc Herniations: Disc herniations that create pressure on the spinal nerve or on the spinal cord are frequently treated by Chiropractors and Chiropractic adjustments, traction, etc. This includes both neck and back. Yet, occasionally Chiropractic treatments (adjustments, traction, etc.) will aggravate the problem and rarely surgery may become necessary for correction. Rarely Chiropractic adjustments may also cause worsening of a pre-existing disc problem if the disc is in a weakened condition. These problems occur so rarely that there are no available statics to quantify their probability.

Soft Tissue Injury: Sort tissues primarily refer to muscles and ligaments. Muscles move bones and ligaments limit joint movement. Rarely a Chiropractic adjustment, traction, massage therapy, etc., may tear some muscle or ligament fibers. The result is a temporary increase in pain and necessary treatments of resolution, but there are no long-term effects for the patient. These problems occur so rarely that there are no available statistics to quantify their probability.

Rib fractures: The ribs are found only in the thoracic spine or middle back. They extend from your back to your front chest area. Rarely a Chiropractic adjustment will crack a rib bone, and this is referred to as a fracture. This occurs only on patients that have weakened bones from such things as osteoporosis. Osteoporosis can be noted on your x-rays. We adjust all patients very carefully, and especially those who have osteoporosis on their x-rays. These problems occur so rarely that there are no available statistics to quantify their probability.

Soreness: It is common for Chiropractic adjustments, traction, massage therapy, passive stretching, exercises, etc., to result in a temporary increase in soreness in the region being treated. This is nearly always a temporary symptom that occurs while your body is undergoing therapeutic change. It is not dangerous, but please tell your doctor about any soreness you experience.

Other Problems: There may be other problems or complications that might arise from Chiropractic treatment other than those noted above. These other problems or complications occur so rarely that it is not possible to anticipate and/or explain them all in advance of treatment.

Chiropractic is a system of health delivery, and therefore, as with any health care delivery system we cannot promise a cure for ANY symptom, disease, or condition because of treatment at this office. We will always give you our best care, and if results are not acceptable, we will refer you to another provider we feel will assist your situation.

If you have any questions on the above, please ask your doctor. When you have a full understanding, please initial and date below.

Patient: You have the right as a patient to be informed about your condition and the recommended modalities and therapies to be used, so that you may make an informed decision whether to undergo the procedure after knowing the potential risks and hazards involved. This disclosure is not meant to scare or alarm you; it is simply to make you better informed so you may give or withhold your consent to the recommended modalities and procedures.

I hereby request and consent to the performance of Chiropractic adjustments, Diagnostic X-rays, Cold Laser Protocols, EMS, Hydro Therapy, passive stretching, active stretching, and exercises, on me even if I have had previous auto-immune disorder(s) and /or cancer(s) (or the patient named below for whom I am legally responsible by the Doctor of Chiropractic named below and/or other licensed Doctors of Chiropractic or those working at the clinic or office who now or in the future treated me while employed by, working or associated with, or serving as a backup for the Doctor of Chiropractic named below.

I can discuss with the Doctor of Chiropractic at Baywest Health & Rehab, LLC, my diagnosis, the nature and purpose of Chiropractic adjustments and other procedures and alternatives.

I understand and have been formed that, in the practice of Chiropractic there are some risk to exam and treatment including, but not limited to: fracture, disc injuries, strokes, dislocations, sprains and increases symptoms and pain or no improvement of symptoms or pain. I do not expect the doctor to be able to anticipate and explain all risks and complications, and I rely on the doctor to exercise judgement during the course of the procedures which the doctor feels at the time, based on the facts then known, is in my interest. I further acknowledge that no guarantees or assurances have been made concerning the results intended from the treatment.

I have read, or have had read to me the above consent. I have also had an opportunity to ask questions, and all my questions have been answered fully and satisfactorily. By signing below, I consent to the treatment plan. I intend this consent to cover the entire course of treatment for my present condition and for any future condition(s) for which I seek treatment.
