## Terms of Acceptance

When a patient seeks chiropractic health care and we accept a patient for such care, it is essential for both to be working towards the same objective. Chiropractic only has one goal. It is important that each patient understands both the objective and the method that will be used to attain it. This will prevent any confusion or disappointment.

**Adjustment:** An adjustment is the specific application of forces to facilitate the body's correction of vertebral subluxation. Our chiropractic method of correction is by specific adjustments of the spine.

**Health:** A state of optimal physical, mental, and social well-being, not merely the absence of disease or infirmity.

**Vertebral Subluxation:** A misalignment of one or more of the 24 vertebrae in the spinal column which causes alteration of nerve function and interference to the transmission of mental impulses, resulting in a lessening of the body's innate ability to express its maximum health potential.

Chiropractic care like all forms of health care, while offering considerable benefit may also provide some level of risk. This level of risk is most often very minimal, yet in rare cases injury has been associated with chiropractic care. The types of complications that have been reported secondary to chiropractic care include sprain/strain injuries, irritation of a disc condition, and rarely, fractures. One of the rarest complications associated with chiropractic care, occurring at a rate between one instance per one million to one per two million cervical spine (neck) adjustments may be a vertebral artery injury that could lead to stroke. Prior to receiving chiropractic care from Cornerstone Chiropractic, a health history and physical examination will be completed. These procedures are performed to assess your specific condition, your overall health and, in particular, your spinal health. These procedures will assist us in determining if chiropractic care is needed, or if any further examination or studies are needed. In addition, they will help us determine if there is any reason to modify your care or provide you with a referral to another health care provider. All relevant findings will be reported to you along with a care plan to beginning care.

It is important to note, we do not offer to diagnose or treat any disease. We only offer to diagnose either vertebral subluxation or neuro-musculoskeletal conditions. However, if during the course of a chiropractic spinal examination, we encounter non-chiropractic or unusual findings, we will advise you. If you desire advice, diagnosis or treatment for those findings, we will recommend that you seek the services of another health care provider. Regardless of what the disease is called, we do not offer to treat it. Nor do we offer advice regarding treatment prescribed by others. OUR ONLY PRACTICE OBJECTIVE is to eliminate a major interference to the expression of the body's innate wisdom. Our only method is specific adjusting to correct vertebral subluxations. However, we may use other procedures to help your body hold the adjustments.

I understand and accept that there are risks associated with chiropractic care and give me consent to the examinations that the chiropractor deems necessary, and to the chiropractic care including spinal adjustments, as reported following assessment.
