### **Dr. Brad Adams earns DABCI Certification**

*Adams is now the only DABCI- board certified doctor in the East Alabama area*

**Auburn, AL**—Auburn-based Advantage Chiropractic Clinic is thrilled to announce that Dr. Brad Adams has just earned his Diplomate of the American Board of Chiropractic Internists certification. This makes Dr. Adams the only doctor in the East Alabama area with this designation.

The DABCI follows the successful completion of a three-year post-doctoral program and examination certified by the American Chiropractic Association. Dr. Adams adds his newly-earned DABCI board certification to his previous board certification, Diplomate of the Academy of Chiropractic Orthopedists (DACO). He is one of the few double Board certified Chiropractic Physicians in the United States.

Doctors with DABCI designations are chiropractic internists, meaning they focus less on controlling a patient's symptoms and more on detecting and correcting the source of a disease or medical issue. Advantage Chiropractic Clinic is excited for what this new certification means for its patients.

Dr. Adams states, "I enjoy the opportunity to help our patients regain and take control of their own health. Many times they have given up hope after exhausting the limits of traditional medications and testing that provides them with few answers. When I explain to them the benefits of functional

medicine and how we go about restoring health as opposed to treating the symptoms it's rewarding to see lost hope restored."

Dr. Adams and Dr. Tom Vrbka, DC, DACBSP, founded Advantage Chiropractic Clinic 13 years ago with the intention of offering comprehensive care in an inviting and unintimidating community-centered environment. For more than a decade, Advantage Chiropractic Clinic has succeeded in providing quality patient care using proven and innovative non-surgical techniques to treat and prevent ailments in over 100,000 office appointments since 2006.

Advantage Chiropractic Clinic works to establish an interactive partnership with each patient including personal consultations in a relaxed atmosphere, thorough and detailed diagnosis and treatment, state-of-the-art rehabilitation and attentive follow-up care in order to promote understanding, health and wellness.

Advantage Chiropractic Clinic is located at 2408 East University Drive Suite 101 in Auburn, Alabama. For more information, please contact Penny Alexander at 334-821-2552 or [penny@advantagechiropracticclinic.com](mailto:penny@advantagechiropracticclinic.com).
