How Fibromyalgia Happens

Muscle cells overloaded with irritating cellular debris causing constant muscle pain.

Stress loads increase our need for antioxidants and magnesium. When these essential nutrients are not available the cell loses the ability to remove cellular debris. Irritants can build up inside the muscle cells where nerves enter the muscle resulting pain.

How we can help you get back on track

Our goal is to removal cellular debris that is causing the nerve irritation and prevent future build up.

Delayed reaction response (LRA - Lymphocyte Response Assay Test) begins two hours to four days after the exposure and the inflammation can lasts up to three weeks. We test for **additives, chemicals, colorings, foods, molds, preservatives, and toxic metals** to determine what is burdening your body.

We provide Nutritional Supplementation to **repair the muscles**.

Whole body detoxification to remove the inflammatory particles in the cells.

Get closer to being pain free with energy
