SYMBIOME CMF-50B

Commensal Microbiome Footprint

Nutritional Support for the Human Ecosystem

30 Veggie acid-resistant capsules with pH targeted release

Matrix Nutritional Series

Immune, Microbiome, Digestion, Brain

Matrix Nutritionals Series was designed as an eclectic offering for the Physica Energetics line of remedies primarily to assist in the "reactivation of the mesenchyme" (Dr. Reinhold Voll), via the nutritional complement pathways. These pathways are present in every system throughout the body and require balanced attention. In keeping with the principles of BioEnergetic Medicine, the remedies nourish and support these systems without punishing them with overstimulation or imbalancing factors, which, ultimately, is counterproductive. This approach has been carefully and respectfully designed to provide the necessary natural (organic where available), synergistic factors in proper energetic and biochemical ratios, to ensure assistance towards yielding a deep and lasting result. They are not to be confused with replacement therapy nutraceuticals that may seem to help for the moment, until the patient stops taking them or the condition is driven deeper. These remedies honour The Legacy of BioEnergetic Medicine, and are known by both patient and practitioner to be exceptionally effective.

The human genome has been referred to as the blueprint of human biology. An essential, but largely ignored overlay to that blueprint is the human microbiome. The human microbiome is a source of GENETIC DIVERSITY, a modifier of disease, an essential component of immunity, and a functional "entity" that influencing metabolism and modulating systemic biochemistry.

It is the aggregate of all microbiota that reside on or within human tissues and biofluids, including the corresponding anatomical sites in which they reside. The commensal microbiota that inhabit different parts of the GI tract has been shaped by co-evolution with the host species. The symbiotic relationship of the hundreds of microbial species with the host requires a tuned response that prevents host damage (eg inflammation) whilst innately integrating the presence of beneficial microbes. You'll recall French physiologist Claude Bernard's concept of milieu intérieur (internal environment) attempting to establish the determinants of a healthy immune response by identifying genetic and environmental factors that contribute to the multi-heterogeneity of the "terrain".

Experienced practitioners know that more isn't necessarily better. While it's important that there be sufficient potency represented as CFU (Colony Forming Units), *the power of any natural remedy formula is found in the recipe.* In other words, the ratios, proportions necessary to create the target Causal Chain through which the healing power of the matrix, articulated through the spaces of the connecting substance, are VITAL, if the remedy is to perform correctly.

The development of probiotic formulas has moved beyond the inclusion of general, generic groups of organisms, to defining specific strains. Many probiotic formulations list their probiotics without identification of the specific strain or the amounts. Symbiome CMF-50B includes only probiotics that have been identified by genomic sequencing and registered with a specific strain identification. This is important as these strain-specific probiotics have undergone rigorous genomic studies *guaranteeing accurate specificity and potency.* These are the robust strains capable of surviving the inhospitable transport to the intestines where they attach to the intestinal walls to grow and function to

effectively sustain GI health & systemic terrain.

*The survivability and clinical effectiveness of these hypoallergenic strains is further amplified by the unique ratio and proportionally-correct, symbiotic blending in the nutrient rich host medium of **pre and post biotics**, biologically and bioenergetically sequentially integrated within the formula.*

Our **veggie acid-resistant pH targeted release capsules** pass unaltered through digestive acidic and bile resistant conditions to disintegrate in the higher pH levels of the duodenum where they are transported to GALT lymphatic tissues & Peyer's patches' immune cells. This design insures that the formula is delivered intact to fortify the systemic microbiome and support immune & hormonal function, lungs, brain challenges, skin, digestive & vaginal imbalances etc.

The bidirectional communication between the brain and the gastrointestinal tract, the so-called "brain-gut-brain axis," is based on a complex system, including the vagus nerve, but also the sympathetic via the prevertebral ganglia, endocrine, immune, and humoral links. This requires a healthy gut microbiota to regulate gastrointestinal homeostasis and to connect *emotional and cognitive* areas of the brain with gut functions. The ENS is not as autonomous as may have been believed.

Tight junctions are the gatekeepers between the cells of the mega-membrane which extends from the nasal cavity to the colon. Tight junction integrity can be impacted by environmental factors such as glyphosate. As a result, the immune system can be overwhelmed.

These 10 highly researched probiotic strains and the nutrient-rich host medium of Symbiome CMF-50B have been meticulously designed to nutritionally support the specific pathways and components vital to the creation of a wholesome microbiome pattern establishing the foundation for a powerful, targeted, and poly-systemic Causal Chain healing milieu.

Each Acid-Resistant 226 mg Veggie Capsule Contains:

Bifidobacterium lactis HN019	17.50 Billion CFU
Lactobacillus acidophilus NCFM	8.50 Billion CFU
Lactobacillus plantarum UApP-05	5.50 Billion CFU
Lactobacillus fermentum MAK	3.50 Billion CFU
Lactobacillus paracasei LPC-37	3.00 Billion CFU
Lactobacillus salivarius UALs-07	2.75 Billion CFU
Lactobacillus rhamnosus HN001	2.75 Billion CFU
Bifidobacterium longum UABp-14	2.25 Billion CFU
Bifidobacterium breve UABbr-11	2.25 Billion CFU
Bifidobacterium bifidum UABb-10	2.00 Billion CFU

Symbiotically blended in a 160mg proprietary nutrient-rich host medium of Humic & Fulvic Acids, Organic immune medicinal modulating mushrooms, pre and post probiotics

Pure Himalayan Shilajit (resin) 10:1, Organic Turkey Tail Mushroom 4:1, Organic Chaga mushroom (Inonotus obliquus) 4:1, Organic Cordyceps mushroom (sinensis) 4:1, Spanish Moss extract (Tillandsia usneides) 4:1, Arabinolactan (Larix spp.) 10:1.

Symbiome CMF-50B does not need to be refrigerated. Suggest keeping in a cool location after opening. It is created with a .51B overfill to compensate for extreme weather fluctuations.
