Terms of Acceptance

In order to provide the most effective healing environment, most effective application of chiropractic procedures, and the strongest possible doctor-patient relationship, it is essential for both parties to be working toward the same objective. It is important that each person understand both the objective and the method that will be used to attain this goal. This will prevent any confusion or disappointment.

- Chiropractic is a very specific science, authorized by law to address spinal health concerns and needs. It is not the practice of medicine.
- Chiropractic seems to maximize the inherent healing power of the human body by restoring normal nerve functions through the adjustments of spinal subluxation(s). Subluxations are deviations from normal spinal structures and configurations that interfere with normal nerve processes.
- The chiropractic adjustment process, as defined in the law of this jurisdiction, involves the application of a specific directional thrust to a region or regions of the spine with the specific intent of repositioning misaligned spinal segments. This is a safe, effective procedure applied over one million times a day with doctors of chiropractic in the United States alone
- Chiropractic does not seek to replace or compete with your medical, dental or other types(s) of health professionals. They retain responsibility for care and management of medical conditions. We do not offer advice regarding treatment prescribed by others.

Informed Consent For Chiropractic Care

Chiropractic Care, like all forms of healthcare while offering considerable benefits may also provide some level of risk. This level of risk is often very minimal Yet in rare cases, injury has been associated with chiropractic care. The types of complications that have been reported secondary to chiropractic care include: sprain/strain injuries, irritation of a disc condition, and rarely, fractures, one of the rarest complications associated with chiropractic care occurring at a rate between one instance per one million TC on per two million cervical spine (neck) adjustments may be a vertebral injury that could lead to a stroke.

Prior to receiving chiropractic care in this office, a health history and physical examination will be completed. These procedures are performed to assess your specific conditions. Your overall health and in particular your spinal health. These procedures will assist us in determining if chiropractic care is needed, and if any further examinations or studies are needed. In addition, they will help us determine if there is any reason to modify your care or provide you with a referral to another healthcare provider. All relevant findings will be reported to you along with a care plan prior to beginning care.

- I understand and accept that there are risks associated with chiropractic care and give consent to the examination that the doctor deems necessary and the chiropractic care, including spinal adjustments, as reported following my assessment.
- I authorize and request payment of insurance benefits directly to Chase Parlett, DC. I agree that this authorization will cover all services rendered until I revoke the authorization. I agree that a photocopy of this form may be used in place of the original. All professional services rendered are charged to the patient. It is customary to pay for services when rendered unless other arrangements have been made in advance. I understand that I am financially responsible for charges not covered by this assignment.
