A simple way to...
straighter teeth

 ClearSmile
INMAN ALIGNER

Why should I straighten my teeth?

Because crooked teeth always crowd more over time and are more likely to chip as a result.

How does it work?

Two clear bows in front and behind your teeth are activated by springs. These create a gentle pressure that guides the front teeth into their ideal position.

Is it visible?

Only a clear plastic bow is visible on the front of your teeth.

Will it interfere with speech?

There will be some interference, especially at the beginning.

Does it hurt?

The Inman Aligner applies only gentle pressure so any initial discomfort is minimised.

How long will the treatment last?

Most cases usually complete in 6-16 weeks.

How many hours a day should the Inman Aligner be worn?

15-20 hours a day.

“The Inman Aligner was so fast and so comfortable, I honestly couldn’t believe it... brilliant!”
