TERMS OF ACCEPTANCE

In order to provide for the most effective healing environment, most effective application of chiropractic procedures, and the strongest possible doctor-patient relationship, it is our wish to provide each patient with a set of parameters and declarations that will facilitate the goal of optimum health through chiropractic. To that end, we ask that you would acknowledge the following points regarding chiropractic care in the services that are offered through this clinic:

- A. Chiropractic is a very specific science, authorized by law to address spinal health concerns and needs.
- B. Chiropractic seeks to maximize the inherent healing power of the human body by restoring normal nerve functions through the adjustment of the spinal subluxation(s). Subluxations are deviations from the normal spinal structures and configurations that interfere with normal nerve processes.
- C. The chiropractic adjustment process, as defined in the law of this jurisdiction, involves the application of a specific directional thrust to a region or regions of the spine with a specific intent of positioning misaligned spinal segments. This is a safe, effective procedure applied over 1 million times each day by Doctors of Chiropractic in the United States, alone.
- D. A thorough chiropractic examination and evaluation is part of the standard chiropractic procedure. The goal of this process is to identify any spinal health problems and chiropractic needs. If during this process, any condition or question outside the scope of chiropractic is identified, you will receive a prompt referral to an appropriate provider or specialist, according to the initial indicators of need.
- E. Chiropractic does not seek to replace or compete with your medical, dental, or other types of health professionals. They retain responsibility for care and management of medical conditions. We do not offer advice regarding treatment prescribed by others.
- F. Your compliance with care recommendations, home and self-care, etc., is essential to maximum healing in optimal health through chiropractic.
- G. We invite you to speak frankly to the doctor on any matter related to your care at this facility, its nature, duration, or cost. We work to maintain as a supporting, open environment.

By my signature below, I have read and fully understand the above statements. All my questions regarding the doctors objectives pertaining to my care in this office have been answered to my satisfaction. I, therefore, accept chiropractic care on this basis.

INFORMED CONSENT FOR CHIROPRACTIC CARE

Chiropractic care, like all forms of healthcare, while offering considerable benefits may also provide some level of risk. This level of risk is most often very minimal, yet in rare cases, injury has been associated with chiropractic care. The types of complications that have been reported secondary to chiropractic care include: sprain/strain injuries, irritation of a disc condition, and rarely, fractures. Prior to receiving chiropractic care in this chiropractic office, a health history and physical examination will be completed. These procedures are performed to assess your specific conditions, your overall health, and in particular your spinal health. These procedures will assist us in determining if chiropractic care is needed, or if any further examination or studies are needed. In addition, they will help us determine if there is any reason to modify your care or provide you with a referral to another health care provider. All relevant findings will be reported to you along with care recommendations prior to beginning care.

I understand and accept there are risks associated with chiropractic care. I give consent to the examination and the chiropractic care the doctor deems necessary, including spinal adjustments, as reported following my assessment.
