## Terms of Acceptance

When a patient seeks chiropractic healthcare and we accept a patient for such care, it is essential for both to be working towards the same objective. Chiropractic has only one goal. It is important that each patient understand both the objective and the method in order to obtain this goal. This will prevent any confusion or disappointment.

An **adjustment** is the specific application of forces to facilitate the body's correction of vertebral subluxation. Our chiropractic method of correction is by specific adjustments of the spine. **Health** is a state of optimal function physically, mentally, socially and emotionally, not merely the absence of symptoms or disease. **Vertebral Subluxation** is a misalignment of one or more of the 24 vertebrae in the spinal column which causes alteration of nerve function and interference to the transmission of mental impulses, resulting in a lessening of the body's innate ability to express its maximum health potential.

We do not offer to diagnose or treat any disease or condition other than vertebral subluxation. However, if during the course of a chiropractic spinal evaluation, we encounter non-chiropractic or unusual findings, we will advise you. If you desire advice, diagnosis or treatment for those findings, we will recommend that you seek the services of a health care provider who specializes in that area.

Regardless of what the disease is called, we do not offer to treat it. Nor do we offer advice regarding treatment prescribed by others. **Our only practice objective** is to eliminate a major interference to the expression of the body's innate wisdom. Our only method is specific adjusting to correct vertebral subluxations.

My signature below certifies that I have read and fully understand the above statements and I therefore accept chiropractic care on this basis.

## X-ray Release

**X-ray Confirmation:** This certifies that any concerns regarding radiation have been explained to my satisfaction. I have informed the doctor if I am currently pregnant or breastfeeding. I understand that X-rays will only be recommended to me if the doctor deems them clinically necessary. If they are recommended, I grant my permission for this procedure. In doing so, I release the Doctor from responsibility of potential damage arising there from.
