Our Patients Speak

June 1, 2016

For those of you who are just looking into the treatment with Dr. Moore and his staff, I just wanted to let you know that I was unsure about this treatment. After several doctors had told me that back surgery was my only option, and the cost of this treatment made me very skeptical. I will tell you now it is worth it! When Dr. Moore tells you that you are going to get results, you are absolutely going to get the results he says you will.

I am a construction worker with a large family to support. I was looking at a year and a half of being off work with no income to support my family. I met with Dr. Moore, and after three months of doing treatment I am back to work and providing for my family again. Although this may be costly and may also be a rough road, I will tell you right now *it is worth it!*

Thank you Dr. Moore and your staff for giving me my freedom back.

Cory Bragg

A handwritten signature in blue ink, appearing to read 'Cory Bragg'.
