

VAX-D In Their Own Words

November 2009

Over the last 2 years I have been experiencing constant pain in my neck and pinching of my sciatic nerve in my back. My head mobility was almost nill for turning, looking down and just doing the simplest of tasks.

After many treatments of acupuncture, Ontario laser, and physiotherapy, none of which seemed to work, I found myself wasting money. I decided to give up on everything and figured that my life would be like this forever and I would never find anything that worked.

I then became a new Grandmother and wanted to enjoy my new granddaughter, but I could not stand the constant pain when holding her. It was almost unbearable.

My husband had seen an ad for Dr. Moore's clinic and told me I should give it a try. I was very sceptical because nothing had ever worked and I had given up. My husband told me I needed to try it and get my life back again so I could enjoy our granddaughter.

I decided to make the call and book an appointment, which was very fast to get. Dr. Moore assessed me and took x-rays. He then set up a VAX-D plan. I was still very sceptical because of all the wasted money and no results.

The treatment I was going to be receiving was VAX-D on my lumbar spine for 20 sessions everyday. I attended these sessions daily and after the first session I noticed results.

After having 20 sessions I saw amazing results. I had no more sciatic pinching and I felt fantastic. I could now hold my granddaughter without any pain and do everything I used to do without my sciatic pinching.

I still had my neck pain so I underwent Cervical VAX-D next. After my treatments I have all my mobility back in my neck and no pain at all!

Dr. Moore has made me a happier person and a very happy grandmother who can now enjoy her granddaughter everyday.

I still see Dr. Moore for a maintenance program but it is well worth it. I feel great thanks to Dr. Moore and his staff!

I would like to especially thank Melissa who made sure everything was handled properly and truly is an excellent person with everyone.

I have achieved excellent results and will tell everyone about this treatment. The end result is worth every penny!

Thanks again for everything,

D.A.
