

vax: D In Their Own Words

September 3, 2007

Thank you Dr. Moore

Just before I came into your clinic I was regularly collapsing on the ground, floor, and street. I was afraid to exercise, stretch, or strengthen my muscles because I never knew when the pain would attack and the pain was excruciating.

The decompression treatments enabled me to achieve enough movement and deterred enough pain that I am now able to follow my physiotherapist's rehabilitation regiment. I have not collapsed in months because of back pain and now have hope that one day I will be fully recovered.

In addition to the decompression and chiropractic treatments I also want to thank you for your compassion and sensitivity. You truly care about your patients which makes a great deal of difference when you are in so much need of care.

I hope my family and friends never need chiropractic and decompression treatment, however, if or when they do I will also hope they acquire the same great care I received by coming to you.
