Please initial each statement

_____ I acknowledge that the Webster technique is a specific Chiropractic analysis and diversified adjustment. The goal of the adjustment is to establish balance to the structure (joints, muscles, and ligaments) of the mother's pelvis, improving neuro-biomechanical function and allowing the uterus to enlarge symmetrically with the growing baby.

_____ I acknowledge that due to the cumulative effect of stress and trauma to the spine, pelvis, and sacrum over a lifetime, the diameter of the pelvic opening may be compromised which can lead to intrauterine constraint. According to Williams Obstetrics text, any diminished capacity of the pelvis or displacement of the sacrum can lead to dystocia (difficulty) during labor. The correction of these misalignments via the Webster Technique, can have a positive effect on (A) the mother's comfort level throughout pregnancy, (B) the ability of the baby to get into optimal positioning for birth, and (C) the causes of difficult labor.

_____ I acknowledge that this is not a breech turning technique or External Cephalic Version procedure and that the Doctor will in no way be manually manipulating the baby's positioning. Often mothers report feeling an increase in the baby's movement later on in the day following an adjustment, which is considered positive because it indicates that the baby now has more room to do so.

_____ I understand that in rare cases it is possible to have some minor soreness after my first few adjustments, especially if I have never been adjusted before. My Chiropractor will give me specific at home instruction to help avoid this.

_____ I acknowledge that Chiropractic care throughout pregnancy allows for healthier function of the mother and baby. The Webster Technique is tailored to pregnant moms to create balance in the mother's pelvic bones, sacrum, and surrounding muscles and ligaments, therefore reducing the possibility of intrauterine constraint. This offers the baby to get into the best possible positioning for birth which can lead to a safer easier delivery. Chiropractic care during pregnancy is a safe, effective way to support the natural process of birthing.

_____ I acknowledge that all Chiropractic care provided to me in the office will be performed by a licensed, experienced, certified Webster Technique Doctor of Chiropractic.

_____ I authorize Tagliarini Chiropractic to provide my OBGYN or Midwife medical records as needed.
