
YOUR DETAILS

1. The following details must be provided:

Given name: Michael
Family name:
Email address: michael.mckibbin@attadalechiropractic.com
Phone number (if applicable): 08-93305298
Address: 436 Canning Hwy Attadale

PUBLICATION DETAILS

2. The following details must be provided about the article or other published material which is the subject of your complaint:

Name of newspaper, magazine or website: The Age
Date/s of publication: 27-7- 2009
Headline, URL or other identification: Ways to Die. I have sent in a form about this. I have located the email to the Age and include that below.
3. If possible, please also send us a print copy or screenshot of the material. You can [send the material to us](#) by email, fax or post, or upload an attachment to this form: (None)
4. Please tell us where you saw the material (print/online/both): Print

REASONS FOR COMPLAINT

5. Please state in **no more than 400 words** the reasons for your complaint and, where possible, state which of the Council's [Standards of Practice](#) you think have been breached.

(eg. "The article's statement that I threatened my neighbour is untrue and unfair, which breaches the Council's General Principle 1. Also, the newspaper has refused to publish my denial of the allegation, which breaches General Principle 3".)

OTHER INFORMATION

6. Are you identified in the material or directly affected by its contents? If not, please state what has led you to complain.

7. Have you complained to the publication itself? If so, what response did you receive?

Re-allocated Cause of Death.

On 27-7- 2009 the Age newspaper published an article "Hospital Botches Kill 4500" which was based on a Federal Government Report about public health. ("Hospital botches" are only a part of the entire spectrum of iatrogenesis; harm arising from medical treatment as distinct from the patient's disorder.)

The Age newspaper 29-12-12 published an article 'Ways to Die' which is based upon data from the Australian Bureau of statistics (ABS). 'Ways to Die' did not account for the previously reported 4500 apparently reportable iatrogenic deaths. How did the ABS miss 4500 iatrogenic deaths?

The disappearing trick seems to involve thousands of iatrogenic deaths being re-allocated to other non-iatrogenic causes of death on death certificates. Re-allocation serves to conceal an iatrogenic epidemic while permitting the illusion of acceptably safe medicine.

People in authority in government and the

media have ignored the investigations by both Archer and Null et al of the public domain medical literature about the iatrogenic death toll, which clearly confirms its epidemic magnitude.

Their informed decade's long mutual silence is essential to maintaining public ignorance of the iatrogenic epidemic. Their essential complicity has for decades contributed toward continuing tragic consequences.

I write to formally ask the Age newspaper to publish its guesstimate of Australia's iatrogenic toll, according to the public domain medical literature.

There was no response

I have read the summaries of the Council's complaints processes

8. Have you read the summaries of the Council's complaints processes mentioned at the top of this form?

Note: Information on this form is used by the Council for the purposes of responding to your complaint and may also be used for general research into the operation of our complaints system. Please tell us if you wish any of the information to be confidential to the Council.
