**PLEASE PAY PROVIDER**

## Purpose of Visit?

What is your main health concern or complaint? \_\_\_\_\_

When and how did your symptoms first begin? \_\_\_\_\_

Have you had this before?  No  Yes ; Who did you see for treatment? \_\_\_\_\_

Is it getting:  Worse  Better  Not Changing

## What do you hope to gain from your treatment here?

- Resolve Pain:** Get me moving pain-free
- Optimize Recovery:** Get me moving pain-free and provide guidance and rehabilitation to restore normal function
- Improve Overall Health:** Get me moving pain-free, provide guidance and rehabilitation to restore normal function and help me be proactive in my health and wellness

On the diagram(s) below, please circle the area(s) that applies most to where you experience symptoms or feel pain.

Use these letters to describe the pain:

**S** sharp **D** dull **A** achy **H** hot **C** cold **N** numb/tingling  
**DB** deep and boring **V** variable

Please rate your pain from **0-10** (0 is LEAST and 10 is WORST): \_\_\_\_\_

**When do you feel the pain?**  Constantly  Intermittently  At Night  In the Morning

Does the pain radiate down your legs or arms?  No  Yes

## What activities are you having problems with?

- Balance  Gripping  Lifting  Reaching  Standing
- Bending  Housework  Pulling  Sitting  Travelling
- Fatigue  Kneeling  Pushing  Sleeping  Walking  Other \_\_\_\_\_

## What relieves your pain?

- Rest  Ice  Massage  Other: \_\_\_\_\_
- Movement  Heat  Medication: \_\_\_\_\_

Have you seen anyone else for this condition?  No  Yes: Who have you seen? \_\_\_\_\_

Have you had any imaging for this condition:  X-Ray  CT  MRI  Ultrasound Date: \_\_\_\_\_

Does this problem interfere with:  Work  Family & Social Life  Sports & Hobbies  Sleep

Do you have any secondary complaints? \_\_\_\_\_

Dr. \_\_\_\_\_

## Health History

Please list any serious illnesses, injuries or surgeries and when they occurred: \_\_\_\_\_

Please list any medication you have taken in the past 6 months: \_\_\_\_\_

Please list any allergies: \_\_\_\_\_

Do you have: High blood pressure:  No  Yes; High cholesterol  No  Yes

Current weight (lbs): \_\_\_\_\_ Weight 1 year ago: \_\_\_\_\_

## Family History

Is there a family history of:	Heart Disease	Stroke	Cancer	Diabetes	Arthritis	Other
Mother's Side:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____
Father's Side:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	_____

## Review of Systems

Please check the box for any conditions or symptoms that you have had in the *past six months*

### General

- Fainting
- Headaches
- Fever
- Excessive Sweating
- Loss of Weight
- Night Pain
- Loss of Sleep
- Anxiety/Nervous

### Neurological

- Dizziness
- Blurred Vision
- Paralysis
- Numbness/Tingling
- Clumsiness
- Nausea
- Convulsions
- Loss of Balance

### Genitourinary

- Trouble Urinating
- Blood in Urine/Stool
- Kidney Infection
- Prostate Trouble
- Painful Menstruation
- Irregular/Absent Cycle
- Painful Breasts
- Menopause

### Respiratory

- Asthma
- Chronic Cough
- Difficulty Breathing
- Sinus Infections
- Spitting up Blood
- Spitting up Phlegm
- Sore Throat
- Frequent Colds

### Cardiovascular

- Chest Pain
- Previous Heart Attack
- Previous Stroke
- Angina
- Ankle Swelling
- Poor Circulation
- Irregular Heartbeat
- Varicose Veins

# CANADIAN CHIROPRACTIC PROTECTIVE ASSOCIATION

## CONSENT TO CHIROPRACTIC TREATMENT

It is important for you to consider the benefits, risks and alternatives to the treatment options offered by your chiropractor and to make an informed decision about proceeding with treatment.

Chiropractic treatment includes adjustment, manipulation and mobilization of the spine and other joints of the body, soft-tissue techniques such as massage, and other forms of therapy including, but not limited to, electrical or light therapy and exercise.

### **Benefits**

Chiropractic treatment has been demonstrated to be effective for complaints of the neck, back and other areas of the body caused by nerves, muscles, joints and related tissues. Treatment by your chiropractor can relieve pain, including headache, altered sensation, muscle stiffness and spasm. It can also increase mobility, improve function, and reduce or eliminate the need for drugs or surgery.

### **Risks**

The risks associated with chiropractic treatment vary according to each patient's condition as well as the location and type of treatment.

The risks include:

- **Temporary worsening of symptoms** – Usually, any increase in pre-existing symptoms of pain or stiffness will last only a few hours to a few days.
- **Skin irritation or burn** – Skin irritation or a burn may occur in association with the use of some types of electrical or light therapy. Skin irritation should resolve quickly. A burn may leave a permanent scar.
- **Sprain or strain** – Typically, a muscle or ligament sprain or strain will resolve itself within a few days or weeks with some rest, protection of the area affected and other minor care.
- **Rib fracture** – While a rib fracture is painful and can limit your activity for a period of time, it will generally heal on its own over a period of several weeks without further treatment or surgical intervention.
- **Injury or aggravation of a disc** – Over the course of a lifetime, spinal discs may degenerate or become damaged. A disc can degenerate with aging, while disc damage can occur with common daily activities such as bending or lifting. Patients who already have a degenerated or damaged disc may or may not have symptoms. They may not know they have a problem with a disc. They also may not know their disc condition is worsening because they only experience back or neck problems once in a while.

Chiropractic treatment should not damage a disc that is not already degenerated or damaged, but if there is a pre-existing disc condition, chiropractic treatment, like many common daily activities, may aggravate the disc condition.

The consequences of disc injury or aggravating a pre-existing disc condition will vary with each patient. In the most severe cases, patient symptoms may include impaired back or neck mobility, radiating pain and numbness into the legs or arms, impaired bowel or bladder function, or impaired leg or arm function. Surgery may be needed.

- **Stroke** – Blood flows to the brain through two sets of arteries passing through the neck. These arteries may become weakened and damaged, either over time through aging or disease, or as a result of injury. A blood clot may form in a damaged artery. All or part of the clot may break off and travel up the artery to the brain where it can interrupt blood flow and cause a stroke.

Many common activities of daily living involving ordinary neck movements have been associated with stroke resulting from damage to an artery in the neck, or a clot that already existed in the artery breaking off and travelling up to the brain.

Chiropractic treatment has also been associated with stroke. However, that association occurs very infrequently, and may be explained because an artery was already damaged and the patient was progressing toward a stroke when the patient consulted the chiropractor. **Present medical and scientific evidence does not establish that chiropractic treatment causes either damage to an artery or stroke.**

The consequences of a stroke can be very serious, including significant impairment of vision, speech, balance and brain function, as well as paralysis or death.

### **Alternatives**

Alternatives to chiropractic treatment may include consulting other health professionals. Your chiropractor may also prescribe rest without treatment, or exercise with or without treatment.

### **Questions or Concerns**

You are encouraged to ask questions at any time regarding your assessment and treatment. Bring any concerns you have to the chiropractor's attention. If you are not comfortable, you may stop treatment at any time.

**Please be involved in and responsible for your care. Inform your chiropractor immediately of any change in your condition.**

#### **DO NOT SIGN THIS FORM UNTIL YOU MEET WITH THE CHIROPRACTOR**

I hereby acknowledge that I have discussed with the chiropractor the assessment of my condition and the treatment plan. I understand the nature of the treatment to be provided to me. I have considered the benefits and risks of treatment, as well as the alternatives to treatment. I hereby consent to chiropractic treatment as proposed to me.
