Fragrance-Free Environment

Due to the sensitivities of our patients and employees, we ask that you do not wear any scented lotions, perfumes, after shave lotions, colognes or body sprays to our office. It is our goal to ensure that we have an environment that is conducive to health and wellness. Many people respond to these products in a negative way, causing reactions such as headaches, coughing, scratchy throat or nausea to name a few. If you choose to do so, it may be necessary to reschedule your appointment.

General Recommendation Guidelines

Step One: Fine Tuning Phase

Four to eight weeks for the initial NUTRITION RESPONSE TESTING fine-tuning phase, average 6 at 1 visit per week.

Step Two: Healing and Observation Phase

Approximately six office visits at one every other week. Total number of visits for the Initial Program averages 12 office visits. Some patients will make great improvements in their health initially and be ready to move into…

Step Three: Maintaining

Some will continue on the Healing and Observation Phase for a while longer. This all depends on each individual's overall health, compliance and many other factors. Please remember that nutritional healing is not a quick fix.

Prepayment Plan Available

If you are fully committed to restoring your health and wish to prepay for the recommended number of office calls for the initial fine-tuning and "Healing and Observation" period (12 visits), we will pass on to you a bookkeeping savings of 10%, leaving the balance now payable of only $600.00 (a savings of $60.00) for your first twelve visits.

Bonus Included with Prepayment Plan— as an added bonus, all additional Nutritional Acustic Myography tests (NAM) will be performed without charge if you choose to prepay for your twelve visit package. (These are normally $40 each). In your case we expect to do a minimum of two additional NAM's.

If you choose to prepay for your office visits, this represents an additional savings of at least another $90.00, making your total prepayment a savings of $150.00.

WEBER CHIROPRACTIC & NUTRITIONAL HEALING

Children of patients (age 16 and younger) who are currently on a Nutritional Health Improvement Program qualify for 40% reduction off adult office visit rate when accompanied by their parent. E.g. $30.00

Senior Citizens (age 65 and up) receive 10% discount on follow up office calls. E.g. $45.00 If paying for visits one at a time.

Generally the average cost of a Nutrition Program will run between $50.00 to $200.00 per month during the Healing and Observation Phases and less for Maintaining. Some cases require more and some less. Each case is different and is managed individually. People requiring Allergy-Clearing treatments generally require less than average supplementation.

We do request a minimum of 24 hour advance notice for all cancellations or rescheduling of your appointment. This is a consideration to our Health Practitioners as well as to our clients whom would be able to utilize this time for their own health needs.

I understand that short notice or no shows will incur an office visit charge. _____

----------AGREEMENT TO DO A "NURTITION REPONSE TESTING" PROGRAM----------

I specifically authorize Weber Chiropractic and Nutritional Healing to use a Nutrition Response Testing health analysis and to develop a natural, complementary health improvement program for me which may include dietary guidelines, nutritional supplements, etc. in order to assist me in improving my health, and not for the treatment, or "cure" of any disease.

I understand that this is not a method for "diagnosing" or "treating" of any disease including conditions of cancer, AIDS, infections, or other medical conditions, and that these are not being tested or treated.

No promise or guarantee has been made regarding the results of this testing or any natural health, nutritional or dietary programs recommended, but rather I understand that it is a means by which the body's natural reflexes can be used as an aid to determining possible nutritional imbalances, so that safe natural programs can be developed for the purpose of bringing about a more optimum state of health.

I understand that I am to adhere to the program guidelines. These guidelines have been fully laid out before me and discussed in detail. If I do not fully comply, I understand that this will greatly impact my results and success.

BARNES THYROID TEST

This test was developed by Dr. Broda Barnes, M.D. and is a measurement of the underarm temperature to determine hypo and hyperthyroid states. The test is conducted by the patient in the a.m. before leaving bed - with the temperature being taken for 10 minutes. The test is invalidated if the patient expends any energy prior to taking the test - getting up for any reason, shaking down the thermometer, etc. It is important that the test be conducted for exactly 10 minutes, making the prior positioning of both the thermometer and a clock important.
