

BMMI Ankle Support

BMMI Ankle Support is made of neoprene and is ideal for foot and ankle pain.

The facts about magnets:

BMMI is the original magnet manufactured specifically and exclusively for human medical use.

Only BMMI offers concentric circle magnets, providing a unique magnetic field configuration.

This revolutionary patented technology ensures the optimum magnetic field is applied to the affected area.

Magnets are a medically accepted form of therapy for pain and healing.

Magnets are commonly recommended for use on sports injuries and chronic pain conditions including:

- Tendonitis
- Sprains and strains
- Chronic pain
- Overuse syndrome

BMMI concentric circle magnet has been clinically proven to:

- Reduce pain
- Accelerate healing
- Improve circulation

How BMMI works?

The concentric circle magnetic fields affect the body in two ways:

1. Accelerated healing: The magnetic field causes the blood vessels to dilate, increasing circulation, thus accelerating the natural healing process.
2. Relieves pain: The magnetic field also reduces swelling, a major source of musculoskeletal pain.

Features:

- BMMI Ankle Support contains 2 concentric circle magnets
- One size fits most.
- Gauss: 500 per magnet
- Magnetic fields: 2
