

BMMI Elbow Support

BMMI Elbow Support is lined with coolmax and fits over elbow joint and closes with a hook and loop tab. It is great for cell phone elbow. Contains two BMMI concentric circle magnets.

The facts about magnets: BMMI is the original magnet manufactured specifically and exclusively for human medical use.

Only BMMI offers concentric circle magnets, providing a unique magnetic field Configuration.

This revolutionary patented technology ensures the optimum magnetic field is applied to the affected area.

Magnets are a medically accepted form of therapy for pain and healing.

Magnets are commonly recommended for use on sports injuries and chronic pain conditions including:

- tendonitis
- sprains and strains
- chronic pain
- overuse syndrome
- elbow pain

How BMMI works?

The concentric circle magnetic fields affect the body in two ways:

1. Accelerated healing: The magnetic field causes the blood vessels to dilate, increasing
2. circulation, thus accelerating the natural healing process.
3. Relieves pain: The magnetic field also reduces swelling, a major source of musculoskeletal pain.

Features:

- BMMI Elbow Support reduces pain
- Accelerate healing
- Improve circulation
- Magnetic fields: 2
- Gauss: 500/Magnet
