

BMMI Neck Collar

BMMI Neck Collar is perfect for neck and shoulder pain, while improving circulation and accelerating healing.

It contains seven BMMI concentric circle magnets evenly spaced throughout the length of the collar.

Also has two convenient straps to connect the collar to your bra straps or undershirt to prevent slippage.

Features:

- BMMI Neck Collar is comfortable to wear
- Gauss: 500+ per magnet

BMMI Knee Support

BMMI Knee Support is made with premium quality neoprene and coolmax. It contains two BMMI concentric circle magnets.

The facts about magnets:

BMMI is the original magnet manufactured specifically and exclusively for human medical use. Only BMMI offers concentric circle magnets, providing a unique magnetic field configuration. This revolutionary patented technology ensures the optimum magnetic field is applied to the affected area.

Magnets are a medically accepted form of therapy for pain and healing.

Magnets are commonly recommended for use on sports injuries and chronic pain conditions including:

- Tendonitis
- Sprains and strains
- Chronic pain
- Overuse syndrome
- BMMI Knee Support reduces pain
- Accelerate healing
- Improve circulation

How BMMI works?

The concentric circle magnetic fields affect the body in two ways:

1. Accelerated healing: The magnetic field causes the blood vessels to dilate, increasing circulation, thus accelerating the natural healing process.
2. Relieves pain: The magnetic field also reduces swelling, a major source of musculoskeletal pain.
