

BMMI Wrist Splint

BMMI Neoprene Wrist Splint is lined with coolmax and is ideal for typists or anyone with hand or wrist pain. Underside of splint contains a molded plastic spoon to support the wrist.

The facts about magnets:

BMMI is the original magnet manufactured specifically and exclusively for human medical use.

Only BMMI offers concentric circle magnets, providing a unique magnetic field configuration.

This revolutionary patented technology ensures the optimum magnetic field is applied to the affected area.

Magnets are a medically accepted form of therapy for pain and healing.

Magnets are commonly recommended for use on sports injuries and chronic pain conditions including:

- Tendonitis
- Sprains and strains
- Wrist pain
- Chronic pain
- Overuse syndrome

How BMMI works?

The concentric circle magnetic fields affect the body in two ways:

1. Accelerated healing: The magnetic field causes the blood vessels to dilate, increasing circulation, thus accelerating the natural healing process.
2. Relieves pain: The magnetic field also reduces swelling, a major source of musculoskeletal pain.

Features:

- BMMI Wrist Splint reduces pain
- Improve circulation
- Accelerate pain
- Made for Left and Right
- Magnetic fields: 2
- Gauss: 500/magnet
