Your First **SHOCKWAVE TREATMENT IS COMPLIMENTARY*** with your scheduled adjustment!

- Upon evaluation as some conditions may hinder patient from receiving shockwave treatment

Tennis elbow occurs when the tendons in your elbow are strained and swollen from repetitive motions of the wrist and arm.

TREATING TENNIS ELBOW WITH SHOCKWAVE THERAPY

A NON-INVASIVE TREATMENT METHOD THAT USES ACOUSTIC PRESSURE TO REDUCE THE PAIN AROUND THE ELBOW AREA.

THE ACOUSTIC PRESSURE PROMOTES THE REGENERATIVE AND REPARATIVE PROCESSES OF THE SOFT TISSUE TO INDUCE TISSUE REPAIR OF THE TEARS. THE STIMULATION ALSO ENCOURAGES BLOOD SUPPLY WHICH FACILITATES THE HEALING PROCESS TO RESTORE RANGE OF MOTION
