## Health Conditions

Your spine is the foundation of health and core strength in your body. Shifts in the vertebrae or sections of the spine will spread ultimately causing weakness and distortion to ALL the areas of the spine. These distortions are reflected in abnormal posture. Research shows abnormal posture leads to chronic pain, disease and possibly a shortened life span.<sup>1</sup> Please answer the following questions accurately so we may determine the full extent of your condition.

### CERVICAL SPINE (NECK)

Misalignment of the individual vertebrae or distortion of the complete cervical curve (neck) originating in the neck or a compensation from postural distortions in other areas of the spine may result in many health conditions. Have you experienced any of these symptoms presently or in the past?

**Please indicate (N) = Now, (P) = Past next to all conditions you've experienced or both if applicable.**

## ***Informed Consent to Chiropractic Care***

When a person seeks chiropractic care, it is essential for both the individual and the chiropractor to be working towards the same objective.

Chiropractic care has one goal, to correct vertebral subluxations. It is important that each person understand both the objective and the method that will be used to attain it. This will prevent any confusion or disappointment.

**Health:** A state of optimal physical, mental, and social wellbeing, not merely the absence of symptoms.

**Vertebral Subluxation:** A misalignment of one or more of the 24 vertebrae in the spinal column which causes alteration of the nerve function and interference to the transmission of mental impulses, resulting in a decrease in the body's innate ability to express its maximum health potential.

**Adjustment:** An adjustment is a specific application of forces to facilitate the body's correction of a vertebral subluxation. Our method of correction is by specific adjustments of the neuro-spinal system.

I understand that my care at this office will be focused on the detection and correction of vertebral subluxations. I hereby request and consent to the performance of chiropractic adjustments and assessments. Understanding that everybody has a different potential for wellness thus, the maximal results I will receive in this office cannot be predicted or guaranteed.

Chiropractic care is considered to be one of the safest and most effective forms of care. I understand and am informed that, unlike many other health care professions, the risks associated in receiving chiropractic care are extremely minimal. In recent years there have been rare incidents of injury to the vertebral artery during the course of care by medical doctors, physiotherapists and chiropractors. To put this in perspective, the risk of stroke in the general population is 0.00057%. The risk of stroke after a chiropractic adjustment is 0.00025%. The risk of death from taking an aspirin and/or other anti-inflammatory drugs is 0.04%.

It is not our goal or intention to diagnose, treat or attempt to cure any physical, mental, emotional symptoms. Our expertise is in health, wellness, healing and human physiology. However, if during the course of chiropractic care, we encounter unusual findings, we will bring these to your attention. If you desire advice, diagnosis or treatment for those findings, we will recommend that you seek the services of a health care provider who specializes in that area. Please discuss care alternatives with our chiropractors.

I understand that, under the *Health Insurance Portability and Accountability Act of 1996 (HIPPA)*, I have certain rights to privacy regarding my protected health information. I understand that this information can and will be used to: conduct, plan and direct my treatment and follow up with multiple healthcare providers who may be involved in that treatment directly or indirectly, obtain payment from third party payers, and conduct normal healthcare operations such as quality assessments and physician's certificates.
