## CANADIAN CHIROPRACTIC PROTECTIVE ASSOCIATION

# Informed Consent to Chiropractic Treatment FORM L

There are risks and possible risks associated with manual therapy techniques used by doctors of chiropractic. In particular you should note:

- a) While rare, some patients may experience short term aggravation of symptoms or muscle and ligament strains or sprains as a result of manual therapy techniques. Although uncommon, rib fractures have also been known to occur following certain manual therapy procedures;
- b) There are reported cases of stroke associated with visits to medical doctors and chiropractors. Research and scientific evidence does not establish a cause and effect relationship between chiropractic treatment and the occurrence of stroke. Recent studies suggest that patients may be consulting medical doctors and chiropractors when they are in the early stages of a stroke. In essence, there is a stroke already in progress. However, you are being informed of this reported association because a stroke may cause serious neurological impairment or even death. The possibility of such injuries occurring in association with upper cervical adjustment is extremely remote;
- c) There are rare reported cases of disc injuries identified following cervical and lumbar spinal adjustment, although no scientific evidence has demonstrated such injuries are caused, or may be caused, by spinal adjustments or other chiropractic treatment;
- d) There are infrequent reported cases of burns or skin irritation in association with the use of some types of electrical therapy offered by some doctors of chiropractic.

I acknowledge I have read this consent and I have discussed, or have been offered the opportunity to discuss, with my chiropractor the nature and purpose of chiropractic treatment in general, (including spinal adjustment), the treatment options and recommendations for my condition, and the contents of this Consent.

I consent to the chiropractic treatment recommended to me by my chiropractor including any recommended spinal adjustments.

#### INFORMED CONSENT FOR PHYSIOTHERAPY TREATMENT

As part of the physiotherapy treatments, certain procedures and devices may be utilized as the use of heat, ice, electrotherapy, ultrasound, light therapy and manual therapy.

As part of the exercise program certain procedures, devices and equipment may be utilized such as weight machines, exercise cardiovascular work and functional tasks.

#### I understand and I am informed that:

- 1. There are some slight risks to treatments and assessment, including, but not limited to muscle strains, sprains, disc injuries and burns.
- There are remote chances of injury. However, appropriate tests will be performed to help identify if I may be predisposed to risk or injury.
- 3. I can at any time discuss with the physiotherapist and/or other clinical staff, the nature and purpose of treatments and their risks.
- 4. The results of treatment are not guaranteed. I will discuss the goals of my treatment with my practitioner.
- 5. The personal information that is gathered by this facility will be kept securely within the facility and used only for my health care needs.
- 6. I give the practitioner permission to assess my physical person and discuss/determine the appropriate course of treatment.

I have read and understood the above statement, accept the risk and hereby consent to all my present and future rehabilitation.
