PATIENT INFORMED CONSENT

State law requires offices to obtain your informed consent prior to examination and treatment. The purpose of this form is to inform you. What you're being asked to sign is simply a confirmation that you have been informed of the following:

EXAMINATIONS

X-Rays: This office uses highly sensitive x-ray film, intensifying screens and filters that provide high quality x-rays with the lowest possible x-ray exposure. The only risk with taking x-rays is with pregnancy. If there is any possibility that you are pregnant, inform us prior to any x-ray procedure. If there is no possibility of this condition, the risks are so rare we have no available statistics to qualify their probability.

Chiropractic adjustment/manipulation: The doctor will use his hands or a mechanical device upon your body in such a way as to move your joints in various directions. This procedure may cause an audible "pop" or "click" to be heard coming from your joints; this is not a cause for alarm. There are some material risks involved in doing these procedures. They are as follows:
Pain: Chiropractic treatments may result in a temporary increase in soreness in the area receiving treatment.
Rib fractures: Fractures caused by chiropractic treatments are rare. They occur most frequently in patients with osteoporosis or weakened bones. Evidence of osteoporosis can be noted on your x-rays, and, if detected, the most appropriate and gentle treatments are used, minimizing the possibility of fractures to the ribs.
Disc Injury: Chiropractic treatment is appropriate for the treatment of many kinds of back problems, including some disc problems[i]. Occasionally, chiropractic may aggravate or cause a problem if the disc is in a severely weakened state. However, this occurs so rarely that statistics to quantify the probability are unavailable, but estimates place risk of serious injury at about 1 serious complication per 100 million low back manipulations[ii]
Stroke: The overall incidence of stroke in the general population is about 2 per 1000 people[iii]. Although chiropractic adjustment/manipulation has been implicated as a possible cause of stroke, this possibility is extremely rare. The best available data suggests that stroke, secondary to chiropractic adjustment/manipulation may occur in 1 per 100,000 patients[iv], a rate well below the overall average risk in the general population. In comparison, the overall average risk of death from taking non-steroidal anti-inflammatory drugs (aspirin, ibuprofen, naproxen sodium, etc.) is 4 per 100,000 patients[v]. The risk of serious complication or death from spine surgeries of the neck is 1.25 per 1000 patients[vi]. As you can see, the risk of stroke from chiropractic treatments is much lower than other common medical treatments. Even though the risk is small, we have implemental procedures and tests that will likely reduce the potential for stroke even more.

Chiropractic is a system of health care delivery. As with any health delivery system, we cannot promise a cure for any symptom, disease or condition as a result of treatment in this office. We will always give you our best care, and if your results are not acceptable, we will refer you to another health care provider who we feel will assist your situation.

If you have any questions on the above information, please ask the doctor. When you have a clear understanding, please sign and date below.

I HAVE READ, OR HAVE HAD READ TO ME, THIS CONSENT FORM AND I HAVE BEEN INFORMED OF THE MOST LIKELY COMPLICATIONS, OF THE POSSIBLE UNDESIRED RESULTS OF CHIROPRACTIC EXAMINATION AND TREATMENT IN THIS OFFICE AND UNDERSTAND THEM. I HEREBY AUTHORIZE AND DIRECT DR. COBB AND HIS ASSOCIATES OR ASSISTANT TO PROVIDE SUCH ADDITIONAL SERVICES AS THEY MAY DEEM REASONABLE AND NECESSARY.
