# CHIROPRACTIC ASSOCIATES CONSENT TO TREAT

I hereby request and consent to the performance of chiropractic manipulation and manual therapy techniques and other procedures, including various modes of physical therapeutic modalities and procedures and diagnostic X-rays, where warranted, on me (or on the patient named below, for whom I am legally responsible) by the doctor of chiropractic named below and/or other licensed doctors who now or in the future work at the clinic or office listed below.

I have had an opportunity to discuss with the provider named below the nature and purpose of physical treatments and other procedures. I understand that results are not guaranteed.

I understand and am informed that, as in the practice of medicine, in the practice of chiropractic there are some risks to treatment and diagnostic services including but not limited to:

Chiropractic adjustment/manipulation: increased pain or discomfort, fractures, disc injuries, strokes, dislocations, strains, sprains, soreness and/or stiffness.

Therapeutic Modalities and procedures: additional pain or discomfort. Endurance exercise may cause increased risk of acute Myocardial Infarction (heart attack) in patients with known or possible cardiac conditions.

X-ray/Radiographs: ionizing radiation can be harmful to a fetus for those who are pregnant or might be pregnant.

I do not expect the doctor to be able to anticipate and explain all risks and complications, and I wish to rely upon the doctor to exercise judgment during the course of the procedure which the doctor feels at the time, based upon the facts then known to him or her, is in my best interest.

The availability and nature of other treatment options:

Other treatment options for your condition may include:

- Self-administered, over the counter analgesics and rest
- Medical care and prescription drugs such as anti-inflammatory, muscle relaxants and pain-killers
- Hospitalization
- Surgery

If you chose to use one of the above noted "other treatment" options, you should be aware that there are risks and benefits of such options and you may wish to discuss these with your primary medical physician.

The risks and dangers attendant to remaining untreated:

Remaining untreated may allow the formation of adhesions and reduce mobility which may set up a pain reaction further reducing mobility. Over time this process may complicate treatment making it more difficult and less effective the longer it is postponed.

I have read, or have had read to me, the above consent. I have also had an opportunity to ask questions about its content, and by signing below I agree to the above-named procedures. I intend this consent form to cover the entire course of treatment for my present condition and for any future condition(s) for which I seek treatment.
