

# HOW TO HAVE AMAZING SUCCESS

in your

# MASSAGE THERAPY

Greater than 50% of all massage therapists are not in practice after 3 years of graduation! Was it that you are not taught how to give a good massage? I doubt that! Were you taught how to run a small business which includes how to:

- Get referrals
- Greet your clients
- Right questions to ask to generate compliance
- Appropriate paperwork to run efficient practice
- Office system that produces results

With almost 40 years as a chiropractic physician utilizing massage therapists as independent contractors throughout the majority of that time - we have a simple; but, highly effective system that has been time-tested and proven effective. But, paperwork alone does not run a business. You, the therapist must realize that change does not occur with intent but, with action. You... must be willing to change! Our systematic approach to client retention can be effective if our philosophy of health and wellness is based on improving the clients, function. If you like seeing therapeutic gain rather than being a a rub-dub therapist, this program is for you! Knowing what to say, when to say it and how to say it, is critical in any effective productive business venture. Especially as a Massage Therapist!
