

Set Up POP - iPhone™, iPad™, iPod®

Steps are compatible with 3G and 4.0.

To set up POP, do the following:

1. Tap **Settings**.

2. Tap **Mail, Contacts, Calendars**.
3. Tap **Add Account**.
4. Tap **Other**.
5. Tap **Add Mail Account**.
6. Enter the following information in the spaces provided:
 - Name—Enter your first and last name. This is the name that will appear in the **From** field of messages you send.
 - Address—Enter your entire email address (e.g., myname@mydomain.com).
 - Password—Enter the password for your email account.
 - Description—Enter a descriptive name for the account (e.g., Work Account). This description will be visible only to you.
7. Tap the **Save** button.

8. Tap the **POP** button.
9. Under both the **Incoming Mail Server** and **Outgoing Mail Server** sections, enter the following information:
 - Host Name—Enter the secure server name:
secure.emailsrvr.com
 - User Name—Enter your entire email address (e.g., myname@mydomain.com).

The screenshot shows a configuration screen for mail servers. It is divided into two main sections: 'Incoming Mail Server' and 'Outgoing Mail Server'. Each section contains three input fields: 'Host Name', 'User Name', and 'Password'. The 'Host Name' for both is 'secure.emailsrvr.com'. The 'User Name' for both is 'myname@mydomain.com'. The 'Password' fields are masked with dots.

Incoming Mail Server	
Host Name	secure.emailsrvr.com
User Name	myname@mydomain.com
Password	●●●●●●●●

Outgoing Mail Server	
Host Name	secure.emailsrvr.com
User Name	myname@mydomain.com
Password	●●●●●●●●

10. Tap the **Save** button.
11. The device will verify settings and return to the **Mail, Contacts, Calendars** screen.
