***Therapy Information and Applications***

## **Benefits of PEMF Therapy**

*PEMF 8000 accelerates healing. It accomplishes this by stimulating the body to regenerate its cells and modulate their function to speed up its natural process of recovery. As a result, this therapy reduces recovery time by as much as 66% the average healing rate for the condition in question. Its use is safe, provokes no pain, uses no drugs, and presents no side effects.*

### *Therapy with PEMF8000:*

- *Reduces or eliminates pain in minutes*
- *Accelerates creation of new tissue including cartilage and bone*
- *Increases blood flow and oxygen supply*
- *Recovers flow in capillaries which were blocked*
- *Reestablishes normal cell and organ function*
- *Decreases inflammation and edema*
- *Relaxes tense muscles*
- *Balances the mind*
- *Improves range of motion*
- *And more, as you will see on the following pages!*

**"There have been no medications or physical therapy that helped the pain to this point!"**

"Hi my name is Jackie. I'm a patient of Pr. Pizarro. I have been in severe pain since 2005. When I first came here my pain was at a level 9 out of 10. After 2 treatments, it's down to a 7. There have been no medications or physical therapy that have helped the pain to this point. I've just finished my third treatment for 3 minutes. It brought my pain down to 4. I feel good! It's just a wonderful machine and I'm very happy with it!"

**"I feel much better than when I started! I've had knee trouble for over 25 years.** My knee feels significantly better without taking aspirin. Stairs in particular are much easier to go up and down and that's one of the most important things to help me day to day." - Robert

**"I injured my shoulder, a fracture to the humerus bone. PEMF8000 is working excellent for me!** It's helping heal it so much! The fracture is pretty much eliminated at this point. And it's only been a little over 2 months!" - Carol

**"I'm 92 years old. Two weeks ago I was in a car accident, head on, and my pain was excruciating. The pain was a 10/10.** Now I'm much more able to move my hands I think I'm down to a 0/10. And at this point I'm much much better in my health." - Fran

**"For many many years, I've had back pain, and now my knees. Just one treatment, 2 minutes, has been wonderful for me!** I can move, I can turn. I can twist I can bend! Yet when I came to Dr. Lawlor I was so stiff that I couldn't even move. I could dance now!" - Lee

**"Patients heal far better than they ever did before! Immediately after you get off the technology you feel tremendously different"**  
- Dr. Jim Augustine, DC

## *PEMF8000 Product Details*

*PEMF8000 is the world's leading PEMF device because it dramatically reduces or eliminates pain in one session and with regular use can help accelerate healing of injuries causing acute and chronic pain conditions.*

*We offer a selection of accessories that treat each part of the body:*

- Treatment Loop Small - For small, sensitive, or hard to reach places.*
- Treatment Mattress - For a treatment that stimulates the entire torso.*
- Butterfly Loop - For the joints of the hands, wrists, elbows, knees, ankles.*

*Essential instructions about use and care of the device are included.*

*For instruction about specific applications, we offer advanced personal training with an expert medical doctor and PEMF specialist on request.*

*Every purchase is backed by our 30 day unconditional return policy, life-time customer support, and 2 year manufacturer repair warranty and a limited lifetime warranty.*

### **Unique advantages of therapy with PEMF 8000:**

- *Physiologically stimulates the body toward its own healing*
- *Patient feels better after the very first treatment*
- *Shows practically no contraindications of any kind*
- *Complements most conventional therapeutic methods*
- *It is an entirely painless and non-invasive treatment*
- *Quick and easy application for the patient and therapist*
- *No need for direct contact with the patient's body*
- *High penetrating power sends energy deeply into the tissue*
- *Effects persist beyond treatment after reaching normal cell energy levels*
- *Appropriate to use for human and animal patients*
- *Relatively short treatment time and frequency achieve lasting results*

### **What happens during and after PEMF therapy?**

*During the session, one may feel a mild tingling sensation in the treatment area. Using PEMF induces sleep, especially during the treatment, and improves the quality of sleep. After one session, patients report feeling a decrease in pain and increased energy, relaxation, and range of motion. Pain is relieved from 40 to 70% on average and relief lasts for up to 4 days without followup treatment.*

## Industry Approvals

*The FDA (Food & Drug Administration) has approved the use of PEMF therapy for some specific conditions, including:*

- *Bone growth stimulation*
- *Anxiety and depression*
- *Urinary incontinence*
- *Brain tumor*
- *Mechanical muscular massage*

*In addition, there are more than 2000 studies and clinical trials that show the effectiveness of PEMF treatment for a wide range of conditions available at: [www.PubMed.gov](http://www.PubMed.gov)*

*PEMF has also been featured in media and research publications, including:*

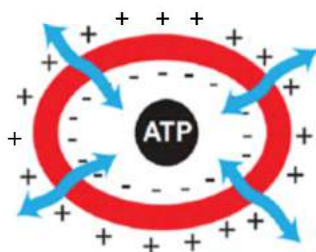

## How PEMF Stimulates Healing

PEMF stands for 'pulsed electromagnetic field' therapy. This is a method of applying a magnetic field to a cell, to which it imparts an electrical signal.

The electrons from this signal influence the interaction of ions in the cell, and thereby improves the flow of nutrients into the cell and increases the production of cellular energy (ATP). This stimulates the body to correct itself because the cells are supported to work under ideal conditions.

The diagram below illustrates the electrical potential of a healthy cell.

The red circle shows the cell barrier. The cell holds a negative ion charge (-) inside and a positive ion charge (+) on the outside. When in balance, these opposing charges enable the cell's metabolism to function normally.

The blue arrows crossing the cell barrier show how PEMF therapy donates electrons to the cell. This increases the electrical potential of the cell to optimum metabolic levels for it to receive nutrients, eliminate waste, produce energy, and heal the body.

In cases of injury, the body funnels additional electrons to the damaged area in order to stimulate the healing process. Chronic pain conditions indicate the body lacks the necessary electrons to fully heal itself.

By donating additional electrons, PEMF therapy greatly improves the speed of the cellular healing process and stimulates healing previously slowed or prevented by lack of electron availability.
